LEGEND

Perfectly adaptable	<i>Recommended. Lens focuses to Infinity</i>
Do Not / Cannot adapt	<i>Not recommended. Will not focus to Infinity</i>
May or may not be available	<i>Most ideal but too slim for a precisely made adapter</i>
Perfectly adaptable	<i>Lens focuses to Infinity. Adapter size will make it bulky</i>
May or may not be available	<i>Images will be cropped to MFT on APS-C & FF bodies</i>

Legend Attributes (colored as Blue)

Adapters are not very thick making it lightweight & non-intrusive
 Lens focuses across the range as on its native body
 Keeps the Form Factor of the camera very compact
 Adapters will have minimal internal reflections
 Relatively cheaper due to its overall size
 Focuses to infinity without any re-calibration

Legend Attributes (colored as Black)

Adapters are little thicker & can appear intrusive
 Lens focuses across the range as on its native body
 The Form Factor of the camera may not be as compact
 If not well made, internal reflections may be high
 Little expensive as well due to its overall size
 Focuses to infinity without any re-calibration

*L-mount is an alliance for interchangeable full frame mirrorless camera systems from Leica (SL I & II), Panasonic Lumix S series (S1, S5) & Sigma FP

All Recommended Combinations

VM Lens to Sony E Body
 VM Lens to Nikon Z Body
 Nikon F Lens to Leica M Body
 VM Lens to Canon Mirrorless Body
 VM Lens to FujiFilm X Body
 VM Lens to MFT Body
 VM Lens to L-mount Body
 Nikon F Lens to Canon EF-S Body
 Nikon F Lens to L-mount Body
 Nikon F Lens to Sony E Body
 Nikon F Lens to Nikon Z Body
 Nikon F Lens to Canon EF-M Body
 Nikon F Lens to Canon EOS R Body
 Nikon F Lens to FujiFilm X Body
 Nikon F Lens to MFT Body

We recommend investing in VM Mount Lenses as they offer the best adaptability matrix across most Camera systems.
